

Jetstream® 40,000 psi Tumble Box Multi-Mode Valve

The Jetstream 40,000 psi multi-mode valve controls the flow of filtered and lubricated air and high-pressure water to the gun or other appropriate device. The quality construction used throughout this valve provides superior results, easier maintenance and longer performance life.

For use with:

- Ideal for use with all high-pressure cleaning systems

Features and Benefits:

- Four modes of operation (dump, constant pressure, dry shut-off and custom modes)
- Requires less air supply pressure
- Self-contained, one-piece cartridge for easy removal, as opposed to other multi-piece units
- Cartridge machined from hardened stainless steel and coated for longer wear life
- Cartridge is hydraulically biased for safer operation, as opposed to spring-return designs which are susceptible to corrosion, wear and failure
- Regulated air supply eliminates damage to valve caused by excessive activation forces
- Rigid tubular frame protects regulator, filter, and oiler components against accidental damage
- Ergonomically designed with readi-grip handle for safe, balanced carrying
- Rugged construction with tubular steel frame and light-weight 3/8-inch aluminum plate
